EXPERIENCE

Maddot Studio, Remote – Front End Developer (Freelancer)

AUGUST 2020 – OCTOBER 2020

- Developed landing page for their design studio using Next.js, Styled-components, Framer motion and ThreeJS, including user interaction with 3D Model.

Copa Airlines, Panama – Business Systems Analyst

APRIL 2017 – AUGUST 2019

- Developed and maintained more than 100 Knowledge base documents.
- Improved the HR software PeopleSoft by analysing and releasing 4 new custom functionalities.
- Analysed and documented all the payroll processes needed in the new payroll system as well as all the system integrations.
- Created an ETL boilerplate using Microsoft SQL Server Integration Services for the payroll system's data migration.
- Led the implementation and data migration of SQLSoftware, the new Payroll System for 32 countries.
- Led the documentation and implementation of all the HR processes and integrations for Oracle HCM Cloud.
- Improved the BSA work hours report by unifying the systems used and simplifying the required steps.

Clarity Chile, Remote – Software Developer

JANUARY 2018 – DECEMBER 2019

- Designed and developed a REST API – hosted in AWS – using Lumen PHP and MySQL for a vehicle inspection application.
- Integrated the REST API with payment gateways and reseller websites to automatically request vehicle inspections.
- Designed and developed a responsive website to manage and consult vehicle inspections, both for administrators and public users using ReactJS.
- Designed and developed a mobile app for vehicle inspections using React Native with an offline first approach.
- Designed a mobile app and database scheme for building risk assessments.

Atesis S.A., Panama – Software Developer & IT Consultant

AUGUST 2014 – AUGUST 2016

- Improved deployment to production by reducing the time needed from 8 hours to 20 minutes.
- Designed and developed 5+ new screens for the Credit Card Management software, including the backend logic using ASP.NET Framework and Microsoft SQL Server stored procedures.
- Implemented changes and design improvements in several pages of the Credit Card Management software (e.g. colour schemes, forms)
- Offered solutions to technological consults (e.g. architecture designs, streamlined procedures, best practices)
